YOUR SUPPORT GIVES COURAGE

Since its foundation in 1996, our non-profit organization delfine therapiere menschen e. V. (dolphins treat people) has helped more than 4,500 families with handicapped persons to access our program for dolphin-assisted therapy. Again and again we are amazed at the incredible impact the therapy with dolphins has on our patients. Jonah (12) is one of those special children whose story we would like to share.

You can help families like Jonah's and give them hope for a better life by supporting our organization in different ways.

» We took part in the dolphin therapy in the summer of 2020, hoping Jonah would overcome his trauma from a surgery in 2016. But in reality, we are dealing with many problem areas. Jonah has a serious cardiac defect and Willebrand syndrome. He has a mental disability, a visual impairment as well as speech and developmental delays.

The two weeks on Curaçao were the best thing that could have happened to the whole family. The most beautiful thing was to see Jonah so happy and self-confident. When he jumped into the water from a bridge, hand in hand with his therapist, I started crying happy tears. Jonah achieved giant improvements in his cognitive abilities. We also found out that he can learn words more easily than letters. In the ten therapy days, he learned and retained 14 words. «

Conny, Jonah's mother

Scientifically proven.
Implemented with love.
